

Vision Area 5: Chronic Disease

Objective 27: Reduce emergency department visits due to diabetes

Diabetes can lead to blindness, heart and blood vessel disease, stroke, kidney failure, amputations, nerve damage, pregnancy complications and birth defects. Emergency department visits for diabetes-related complications may signify that the disease is uncontrolled. In Maryland, there were 20,046 emergency department visits for a primary diagnosis of diabetes in 2010.

Statistics and Goals

Measure: Number of emergency department visits due to diabetes (per 100,000 population)

Source: Maryland Health Services Cost Review Commission

Current US Baseline	Current MD Baseline	Healthy People 2020 Target	MD 2014 Target
N/A	347.2	N/A	330
